

COVID-19 impact on Cancer Admissions in the Grampians Region

The number of admissions based on the Victorian Admitted Episode Dataset (VAED) across the Grampians region were used to compare the pre-pandemic (2019) and post-pandemic of 2020 (and ongoing).

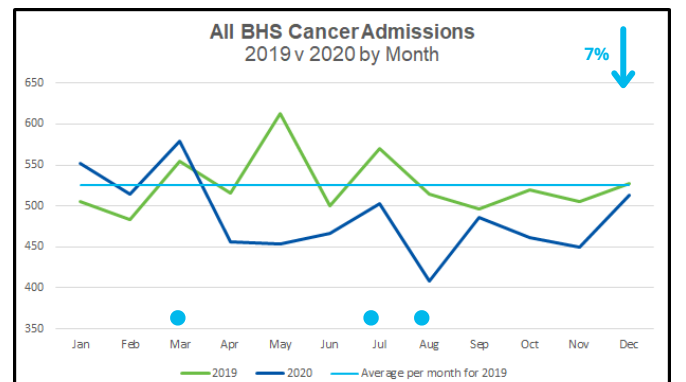

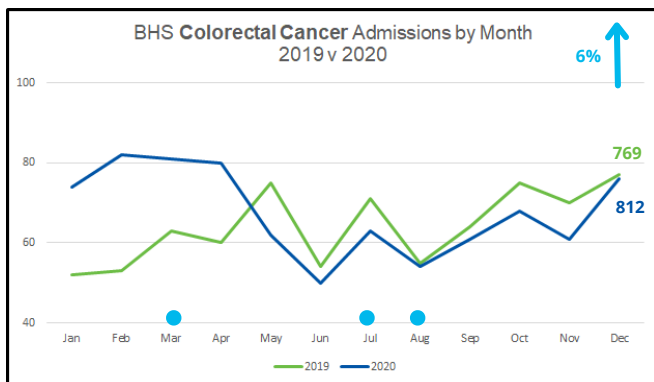

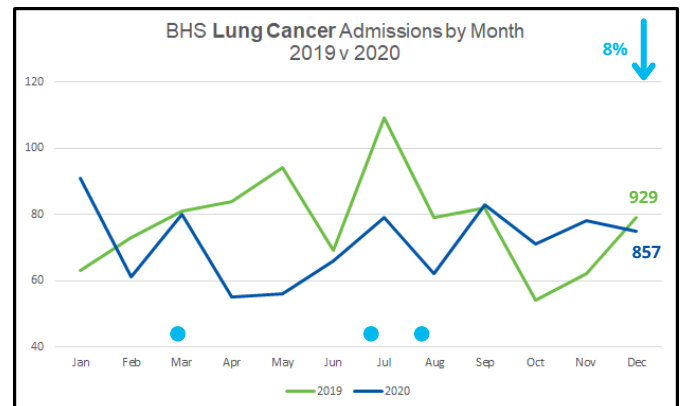

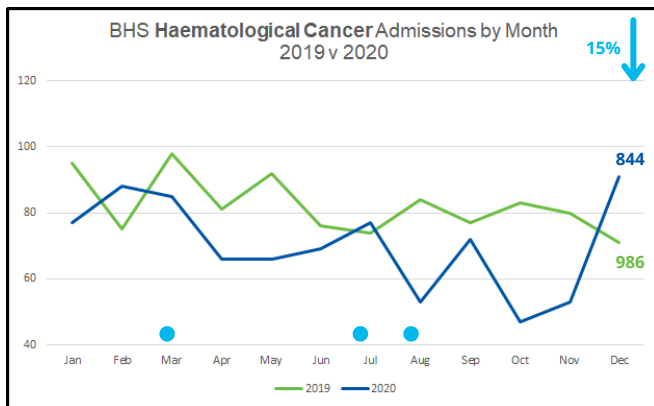

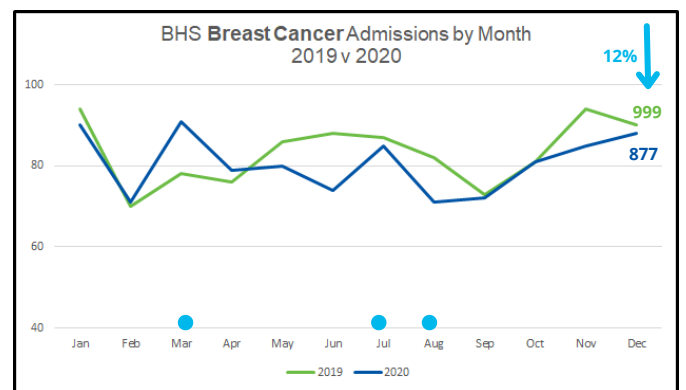

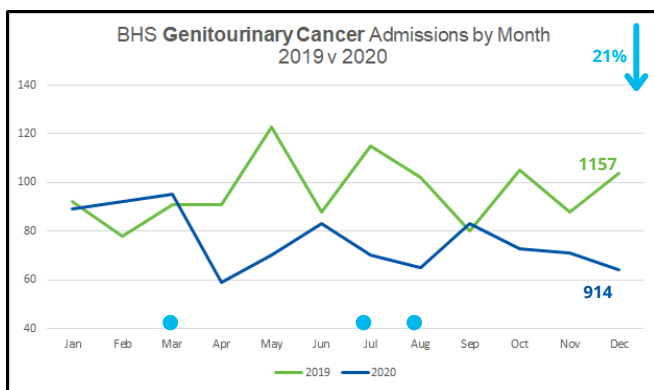

- ↑ Indicates increase in the number of admissions during 2020 compared to 2019 admissions (whole of year).
- ↓ Indicates decrease in the number of admissions during 2020 compared to 2019 admissions (whole of year).
- Indicates Victorian Government restriction commencement dates during 2020, which occurred on 30 March, 8 July & 2 August.

The data indicates that overall there was no observable change in admissions from 2019 to 2020.

COVID-19 impact on Cancer Admissions at Ballarat Health Services (Base Campus)

The number of admissions based on the Victorian Admitted Episode Dataset (VAED) at Ballarat Health Services' Base Campus were used to compare the pre-pandemic (2019) and post-pandemic of 2020 (and ongoing).

- ↑ Indicates increase in the number of admissions during 2020 compared to 2019 admissions (whole of year).
- ↓ Indicates decrease in the number of admissions during 2020 compared to 2019 admissions (whole of year).
- Indicates Victorian Government restriction commencement dates during 2020, which occurred on 30 March, 8 July & 2 August.

A moderate drop of 7% in admissions was observed at Ballarat Health Services in 2020.
