## Tips to consider Following an appointment

---

When you leave an appointment, you may be asked to make other appointments or have further tests.

- Make any further appointments and record these in your diary or appointment calendar
- Find out when and who you will need to phone for test results.
- If you are not sure about anything you were told, phone the clinic or person you visited.
- Keep any paperwork such as test results, notices or referrals in this folder.
- Consider writing down what you talked about and anything you or others need to follow up.
