Cancer Support Groups

A cancer support group is a group of men and women who have been affected by cancer. They are often dealing with a current diagnosis, are survivors of cancer or are living with metastatic cancer. They meet on a regular basis to help each other, discuss shared experiences, and learn more about the disease and how to manage it. The group may be chaired by a member trained in support group facilitation or by a health professional.

Life After a Cancer Diagnosis

Life after being told you have cancer can present its own challenges. You may be dealing with early phases of treatment after the diagnosis. You may be having more investigations. You may be dealing with late effects of the disease and treatment, or you may be living with metastatic disease. Whatever your personal experiences are, these services aim to optimise the health and wellbeing of people diagnosed with cancer and their carers.
